

Vestas Graduate Programme

Get a fast-track, global career and contribute to a sustainable tomorrow

Vestas is the world's leading supplier of wind power solutions. Our wind turbines generate CO₂-neutral electricity to millions of households.

A great job can change your life – and a great company can change the world. Join the Vestas Graduate Programme and kick-start your career!

During the two-year programme you will complete three modules in countries such as the US, China, India, Singapore, Spain, Poland, Germany, UK and Denmark.

You will be challenged to solve mission critical projects with experienced colleagues around the world to maintain our leading position in a growing market. You will make a difference by using and developing your professional, theoretical and personal skills - and you will become part of a unique, global network of top talents.

We are looking for young top talents in these fields:

- Corporate Social Responsibility
- Finance & Controlling
- Government Relations
- IT & Business Processes
- People & Culture
- Project Management
- Production Engineering
- Quality, Safety & Environment
- Research & Development
- Sales
- Service
- Supply Chain Management

The Graduate Programme starts up twice a year, 1 March and 1 September.
